

The Biology of Peace and War

**Men, Animals, and
Aggression**

THAMES AND HUDSON

Contents

Acknowledgments	vi
1. Is Aggression Inevitable?	1
2. Seeking the Causes of Behavior	7
Basic Ethological Concepts: The Innate in Animal and Human Behavior	8
The Comparative Method in Ethology	19
Functional Laws of Phylogenetic and Cultural Evolution	21
3. Aggression within the Group	29
Aggressive Behavior in the Animal Kingdom	37
Functions of Aggressive Behavior	40
Adaptations that Determine Aggressive Behavior	47
4. The "Peaceful" Primate: Territory and Aggression	60
Intraspecific Aggression	80
Predatory Aggression	69
Aggression against Predators	74
Use of Weapons	75

5. Aggression in Man	78
Intragroup Aggression: Its Forms and Effects	79
Control of Intragroup Aggression	91
Inborn Programs in Human Aggressive Behavior	104
Learning Processes in the Development of Aggressive Behavior	115
6. Intergroup Aggression and War	122
The Cultural Evolution to War	122
Paradise Lost?	125
Territoriality and Aggressivity among Hunters and Food Gatherers	129
Misunderstanding and Prejudice in the Human Sciences	161
Causes and Functions of War	169
7. On the Way to Peace	188
War and Conscience	188
A Mourning Ritual in the Highlands of New Guinea	196
Control of Intergroup Aggression	204
Patterns of Conflict Control	217
Models of Harmonization and Education for Peace	226
Conclusion	241
Notes	243
Bibliography	265
Index	286
