

Towards efficient use of water resources in Europe

Contents

Executive summary	4
1 Introduction	7
1.1 EU resource-efficiency policy	7
1.2 Resource efficiency and sustainable water management.....	8
1.3 Aims and structure of this report.....	10
2 Water-resource efficiency – measures and tools.....	11
2.1 Reducing water use – increasing water use efficiency.....	11
2.2 Water and energy sector linkages	17
2.3 Water quality and resource efficiency.....	22
3 Using markets to enhance water-resource efficiency.....	28
3.1 Water allocation mechanisms	28
3.2 Economic instruments to correct market failure.....	30
3.3 Water pricing and cost recovery in Europe.....	31
4 Improved information for optimal water-resource management	36
4.1 The role of indicators in quantifying and evaluating water efficiency.....	36
4.2 Water accounting as a framework for understanding linkages between water resources and the economy	45
4.3 Water Footprint Assessment and Life Cycle Analysis.....	48
4.4 Labelling and certification, standards and stewardship	50
5 Conclusions	52
5.1 A scarce resource requires careful management.....	52
5.2 Principles of sustainable water management.....	52
5.3 Tools and measures.....	53
5.4 The water-energy link	54
5.5 The knowledge base to foster resource efficiency	55
5.6 Future needs for sustainable water management	56
