<i>Preface to the Second Edition</i>	page xvii
<i>Preface to the First Edition</i>	xxi
<b>Part One Equilibrium and Arbitrage</b>	
1 Equilibrium in Security Markets	3
1.1 Introduction	3
1.2 Security Markets	4
1.3 Agents	6
1.4 Consumption and Portfolio Choice	6
1.5 First-Order Conditions	7
1.6 Left and Right Inverses of the Payoff Matrix	8
1.7 General Equilibrium	9
1.8 Existence and Uniqueness of Equilibrium	11
1.9 Representative Agent Models	12
1.10 Notes	12
Bibliography	14
2 Linear Pricing	16
2.1 Introduction	16
2.2 The Law of One Price	16
2.3 The Payoff Pricing Functional	17
2.4 Linear Equilibrium Pricing	18
2.5 State Prices in Complete Markets	20
2.6 Recasting the Optimization Problem	*, 21
2.7 Notes	\ 22
Bibliography	23
3 Arbitrage and Positive Pricing	24
3.1 Introduction	24
3.2 Arbitrage and Strong Arbitrage	- 24

3.3	Diagrammatic Representation	25
3.4	Positivity of the Payoff Pricing Functional	28
3.5	Positive State Prices	29
3.6	Arbitrage and Optimal Portfolios	29
3.7	Positive Equilibrium Pricing	32
3.8	Notes	32
	Bibliography	33
<b>Part Two Valuation</b>		
4	Valuation	37
4.1	Introduction	37
4.2	The Fundamental Theorem of Finance	38
4.3	Bounds on the Values of Contingent Claims	39
4.4	The Extension	43
4.5	Uniqueness of the Valuation Functional	45
4.6	Notes	46
	Bibliography	46
5	State Prices and Risk-Neutral Probabilities	47
5.1	Introduction	47
5.2	State Prices	47
5.3	Farkas-Stiemke Lemma	50
5.4	Diagrammatic Representation	51
5.5	State Prices and Value Bounds	51
5.6	Risk-Free Payoffs	52
5.7	Risk-Neutral Probabilities	53
5.8	Notes	54
	Bibliography	55
<b>Part Three Portfolio Restrictions</b>		
6	Portfolio Restrictions	59
6.1	Introduction	59
6.2	Short Sales Restrictions	59
6.3	Portfolio Choice under Short-Sales Restrictions	61
6.4	The Law of One Price	62
6.5	Arbitrage under Short-Sales Restrictions	63
6.6	Diagrammatic Representation	64
6.7	Bid-Ask Spreads	64
6.8	Bid-Ask Spreads in Equilibrium	66
6.9	Notes	68
	Bibliography	69

7	Valuation under Portfolio Restrictions	70
	7.1 Introduction	70
	7.2 Payoff Pricing under Short-Sales Restrictions	70
	7.3 State Prices under Short-Sales Restrictions	72
	7.4 Diagrammatic Representation	75
	7.5 Bid-Ask Spreads	76
	7.6 Notes	79
	Bibliography	79
<b>Part Four Risk</b>		
8	Expected Utility	83
	8.1 Introduction	83
	8.2 Expected Utility	83
	8.3 Von Neumann-Morgenstern Expected Utility Theory	84
	8.4 Savage's Expected Utility Theory	84
	8.5 State-Separable Utility Representation	85
	8.6 Risk Aversion and Expected Utility Representation	87
	8.7 Ellsberg Paradox	88
	8.8 Multiple-Prior Expected Utility	89
	8.9 Expected Utility with Two-Date Consumption	90
	8.10 Notes	90
	Bibliography	92
9	Risk Aversion	94
	9.1 Introduction	94
	9.2 Risk Aversion and Risk Neutrality	95
	9.3 Risk Aversion and Concavity	96
	9.4 Arrow-Pratt Measures of Absolute Risk Aversion	97
	9.5 Risk Compensation	98
	9.6 The Pratt Theorem	100
	9.7 Decreasing, Constant, and Increasing Risk Aversion	102
	9.8 Relative Risk Aversion	102
	9.9 Utility Functions with Linear Risk Tolerance	103
	9.10 Risk Aversion for Multiple-Prior Expected Utility	104
	9.11 Risk Aversion with Two-Date Consumption	105
	9.12 Notes	106
	Bibliography	107
10	Risk	108
	10.1 Introduction	108
	10.2 Greater Risk	108
	10.3 Uncorrelatedness, Mean Independence, and Independence	110
	10.4 A Property of Mean Independence	110

10.5	Risk and Risk Aversion	111
10.6	Greater Risk and Variance	114
10.7	A Characterization of Greater Risk	115
10.8	Notes	118
	Bibliography	118
<b>Part Five Optimal Portfolios</b>		
11	Optimal Portfolios with One Risky Security	123
11.1	Introduction	123
11.2	Portfolio Choice and Wealth	123
11.3	Optimal Portfolios with One Risky Security	125
11.4	Mean-Variance Optimal Portfolios	126
11.5	Risk Premium and Optimal Portfolios	127
11.6	Optimal Portfolios When the Risk Premium Is Small	129
11.7	Optimal Portfolios for Multiple-Prior Expected Utility	130
11.8	Notes	131
	Bibliography	132
12	Comparative Statics of Optimal Portfolios	133
12.1	Introduction	133
12.2	Wealth	133
12.3	Expected Return	135
12.4	Risk	137
12.5	Optimal Portfolios with Two-Date Consumption	138
12.6	Notes	141
	Bibliography	141
13	Optimal Portfolios with Several Risky Securities	143
13.1	Introduction	143
13.2	Risk-Return Tradeoff	143
13.3	Optimal Portfolios under Fair Pricing	144
13.4	Risk Premia and Optimal Portfolios	145
13.5	Optimal Portfolios under Linear Risk Tolerance	148
13.6	Optimal Portfolios with Two-Date Consumption	150
13.7	Notes	151
	Bibliography	151
<b>Part Six Equilibrium Prices and Allocations</b>		
14	Consumption-Based Security Pricing	155
14.1	Introduction	155
14.2	Risk-Free Return in Equilibrium	155
14.3	Expected Returns in Equilibrium	156
14.4	Equilibrium Consumption and Expected Returns *	157
14.5	Volatility of Marginal Rates of Substitution	159

14.6	A First Pass at the CAPM	161
14.7	Notes	162
	Bibliography	162
15	Complete Markets and Pareto-Optimal Allocations of Risk	164
15.1	Introduction	164
15.2	Pareto-Optimal Allocations	164
15.3	Pareto-Optimal Equilibria in Complete Markets	166
15.4	Complete Markets and Options	167
15.5	Pareto-Optimal Allocations under Expected Utility	168
15.6	Equilibrium Expected Returns in Complete Markets	172
15.7	Pareto-Optimal Allocations under Linear Risk Tolerance	172
15.8	Pareto-Optimal Allocations under Multiple-Prior Expected Utility	174
15.9	Notes	175
	Bibliography	175
16	Optimality in Incomplete Markets	177
16.1	Introduction	177
16.2	Constrained Optimality	177
16.3	Effectively Complete Markets	178
16.4	Equilibria in Effectively Complete Markets	180
16.5	Effectively Complete Markets with No Aggregate Risk	182
16.6	Effectively Complete Markets with Options	183
16.7	Effectively Complete Markets with Linear Risk Tolerance	184
16.8	Representative Agent under Linear Risk Tolerance	187
16.9	Multifund Spanning	189
16.10	A Second Pass at the CAPM	189
16.11	Notes	190
	Bibliography	191
<b>Part Seven Mean-Variance Analysis</b>		
17	The Expectations and Pricing Kernels	195
17.1	Introduction	195
17.2	Hilbert Spaces and Inner Products	196
17.3	The Expectations Inner Product	196
17.4	Orthogonal Vectors	197
17.5	Orthogonal Projections	198
17.6	Diagrammatic Methods in Hilbert Spaces	199
17.7	Riesz Representation Theorem	200
17.8	Construction of the Riesz Kernel	201
17.9	The Expectations Kernel	202

17.10	The Pricing Kernel	204
17.11	Notes	205
	Bibliography	206
18	The Mean-Variance Frontier Payoffs	207
18.1	Introduction	207
18.2	Mean-Variance Frontier Payoffs	207
18.3	Frontier Returns	208
18.4	Zero-Covariance Frontier Returns	213
18.5	Beta Pricing	214
18.6	Mean-Variance Efficient Returns	215
18.7	Volatility of Marginal Rates of Substitution	216
18.8	Notes	217
	Bibliography	218
19	Capital Asset Pricing Model	219
19.1	Introduction	219
19.2	Security Market Line	220
19.3	Mean-Variance Preferences	222
19.4	Equilibrium Portfolios under Mean-Variance Preferences	224
19.5	Quadratic Utilities	225
19.6	Normally Distributed Payoffs	226
19.7	Notes	227
	Bibliography	228
20	Factor Pricing	229
20.1	Introduction	229
20.2	Exact Factor Pricing	229
20.3	Exact Factor Pricing, Beta Pricing, and the CAPM	232
20.4	Factor Pricing Errors	233
20.5	Factor Structure	234
20.6	Mean-Independent Factor Structure	236
20.7	Options as Factors	238
20.8	Notes	239
	Bibliography	241
<b>Part Eight Multidate Security Markets</b>		
21	Equilibrium in Multidate Security Markets	245
21.1	Introduction	245
21.2	Uncertainty and Information	245
21.3	Multidate Security Markets	248
21.4	The Asset Span	249
21.5	Agents	250
21.6	Portfolio Choice and the First-Order Conditions	250

	21.7 General Equilibrium	251
	21.8 Notes	252
	Bibliography	253
22	Multidate Arbitrage and Positivity	254
	22.1 Introduction	254
	22.2 Law of One Price and Linearity	254
	22.3 Arbitrage and Positive Pricing	255
	22.4 One-Period Arbitrage	256
	22.5 Positive Equilibrium Pricing	256
	22.6 Notes	258
	Bibliography	258
23	Dynamically Complete Markets	259
	23.1 Introduction	259
	23.2 Dynamically Complete Markets	259
	23.3 Binomial Security Markets	260
	23.4 Event Prices in Dynamically Complete Markets	261
	23.5 Event Prices in Binomial Security Markets	262
	23.6 Equilibrium in Dynamically Complete Markets	263
	23.7 Pareto-Optimal Equilibria	264
	23.8 Notes	265
	Bibliography	265
24	Valuation	267
	24.1 Introduction	267
	24.2 The Fundamental Theorem of Finance	267
	24.3 Uniqueness of the Valuation Functional	270
	24.4 Notes	270
	Bibliography	270
<b>Part Nine Martingale Property of Security Prices</b>		
25	Event Prices, Risk-Neutral Probabilities, and the Pricing Kernel	273
	25.1 Introduction	273
	25.2 Event Prices	273
	25.3 Security Prices and Values of Dividends	276
	25.4 Risk-Free Return and Discount Factors	276
	25.5 Risk-Neutral Probabilities	277
	25.6 Expected Returns under Risk-Neutral Probabilities	279
	25.7 Risk-Neutral Valuation	280
	25.8 Value Bounds	281
	25.9 The Pricing Kernel	282
	25.10 Notes	283
	Bibliography	284

26	Martingale Property of Gains	285
	26.1 Introduction	285
	26.2 Gain and Discounted Gain	285
	26.3 Martingale Property of Discounted Gains	287
	26.4 Martingale Property of Gains	288
	26.5 Gains on Self-Financing Portfolio Strategies	288
	26.6 Notes	289
	Bibliography	289
27	Conditional Consumption-Based Security Pricing	291
	27.1 Introduction	291
	27.2 Expected Utility	291
	27.3 Risk Aversion	292
	27.4 Conditional Covariance and Variance	293
	27.5 Conditional Consumption-Based Security Pricing	293
	27.6 Security Pricing under Time Separability	295
	27.7 Volatility of Intertemporal Marginal Rates of Substitution	296
	27.8 Notes	297
	Bibliography	297
28	Conditional Beta Pricing and the CAPM	299
	28.1 Introduction	299
	28.2 Two-Date Security Markets at a Date-? Event	300
	28.3 One-Period Pricing and Expectations Kernels	301
	28.4 Conditional Beta Pricing	302
	28.5 Conditional Beta Pricing with Quadratic Utilities	303
	28.6 Multidate Market Return and the CAPM	304
	28.7 Conditional Beta Pricing in Incomplete Markets	306
	28.8 Notes	306
	Bibliography	306
<b>Part Ten Infinite-Time Security Markets</b>		
29	Equilibrium in Infinite-Time Security Markets	311
	29.1 Introduction	311
	29.2 Infinite-Time Security Markets	311
	29.3 Infinitely Lived Agents	312
	29.4 Ponzi Schemes and Portfolio Constraints	313
	29.5 Portfolio Choice and the First-Order Conditions	314
	29.6 Equilibrium under Debt Constraints	315
	29.7 Notes	315
	Bibliography	316
30	Arbitrage, Valuation, and Price Bubbles	318
	30.1 Introduction	318

30.2	Arbitrage under Debt Constraints	318
30.3	Event Prices	320
30.4	Security Prices and Valuation of Dividends	321
30.5	Security Price Bubbles	322
30.6	Equilibrium Price Bubbles	323
30.7	Notes	327
	Bibliography	328
31	Arrow-Debreu Equilibrium in Infinite Time	329
31.1	Introduction	329
31.2	Contingent Commodity Markets	329
31.3	Arrow-Debreu Equilibrium and Pareto-Optimal Allocations	331
31.4	Implementing Arrow-Debreu Equilibrium in Security Markets	331
31.5	Equilibrium in Representative-Agent Economies	334
31.6	Pricing without Countable Additivity	335
31.7	Notes	336
	Bibliography	338
	<i>Index</i>	339
