1 Introduction

Gregory Parnell and Patrick Driscoll

1.1 Purpose 1
1.2 System 3
1.3 Stakeholders 3
1.4 System Life Cycle 5
1.5 Systems Thinking 7
1.6 Systems Engineering Thought Process 8
1.7 Systems Engineering 10
1.8 Engineering Management 11
1.9 Systems Decision Process 12
1.10 Overview 13
1.11 Exercises 14
References 15
PART I SYSTEMS THINKING

2 Systems Thinking 19
Patrick J. Driscoll

2.1 Introduction 19
2.2 Structure 23
2.3 Classification 24
2.4 Boundaries 26
2.5 Visibility 29
2.6 IDEF1 Models 35
2.7 Mathematical Structure 38
2.8 Spatial Arrangement 44
2.9 Evolution 47
2.10 Summary 48
2.11 Exercises 49
References 52

System Life Cycle 55
Patrick J. Driscoll

3.1 Introduction 55
3.2 System Life Cycle Model 58
3.2.1 Establish System Need 58
3.2.2 Develop System Concept 60
3.2.3 Design and Develop System 60
3.2.4 Produce System 61
3.2.5 Deploy System 61
3.2.6 Operate System 62
3.2.7 Retire System 63
3.3 Other Major System Life Cycle Models 69
3.4 Risk Analysis in the System Life Cycle 70
3.4.1 Risk Assessment in the System Life Cycle 69
3.4.2 Prioritizing Risks for Risk Management 70
3.5 Summary 75
3.6 Exercises 76
References 77

Systems Modeling and Analysis 79
Paul D. West, John E. Kobza, and Simon R. Goerger

4.1 Introduction 79
4.2 Developing System Measures 80
4.3 Modeling the System Design 82
4.3.1 What Models Are 83
4.3.2 Why We Use Models 83
CONTENTS  

4.3.3 Role of Models in Solution Design  85
4.3.4 Qualities of Useful Models  85

4.4 The Modeling Process - How We Build Models  88
4.4.1 Create a Conceptual Model  88
4.4.2 Construct the Model  90
4.4.3 Exercise the Model  90
4.4.4 Revise the Model  92

4.5 The Model Toolbox: Types of Models, Their Characteristics, and Uses  92
4.5.1 Characteristics of Models  95
4.5.2 The Model Toolbox  98

4.6 Simulation Modeling  105
4.6.1 Analytical Solutions versus Simulation; When it is Appropriate to Use Simulation  105
4.6.2 Simulation Tools  106

4.7 Determining Required Sample Size  111
4.8 Summary  114
4.9 Exercises  114

References

5 Life Cycle Costing  119
Edward Pohl and Heather Nachtman

5.1 Introduction to Life Cycle Costing  119
5.2 Introduction to Cost Estimating Techniques  121
5.2.1 Types of Costs  125
5.3 Cost Estimation Techniques  126
5.3.1 Estimating by Analogy Using Expert Judgment  127
5.3.2 Parametric Estimation Using Cost Estimating Relationships  128
5.3.3 Learning Curves  141
5.4 System Cost for Systems Decision Making  147
5.4.1 Time Value of Money  147
5.4.2 Inflation  148
5.4.3 Net Present Value  151
5.4.4 Breakeven Analysis and Replacement Analysis  152
5.5 Risk and Uncertainty in Cost Estimation  152
5.5.1 Monte Carlo Simulation Analysis  153
5.5.2 Sensitivity Analysis  157
5.6 Summary  158
5.7 Exercises  159

References
PARTII SYSTEMS ENGINEERING

6 Introduction to Systems Engineering
Gregory S. Parnell

6.1 Introduction
6.2 Definition of System
6.3 Brief History of Systems Engineering
6.4 Systems Trends that Challenge System Engineers
6.5 Three Fundamental Tasks of Systems Engineers
6.6 Relationship of Systems Engineers to Other Engineering Disciplines
6.7 Education and Training of Systems Engineers
6.8 Exercises

References

7 Systems Engineering In Professional Practice
Roger C. Burk

7.1 The Systems Engineer in the Engineering Organization
7.1.1 The Systems Engineering Job
7.1.2 Three Systems Engineering Perspectives
7.1.3 Organizational Placement of Systems Engineers

7.2 Systems Engineering Activities
7.2.1 Establish System Need
7.2.2 Develop System Concept
7.2.3 Design and Develop the System
7.2.4 Produce System
7.2.5 Deploy System
7.2.6 Operate System
7.2.7 Retire System

7.3 The Systems Engineer and Others
7.3.1 The SE and the Program Manager
7.3.2 The SE and the Customer, the User, and the Consumer
7.3.3 The SE and the CTO or CIO
7.3.4 The SE and the Operations Researcher or System Analyst
7.3.5 The SE and the Configuration Manager
7.3.6 The SE and the Life-Cycle Cost Estimator
7.3.7 The SE and the Engineering Manager
7.3.8 The SE and the Discipline Engineer
7.3.9 The SE and the Test Engineer
7.3.10 The SE and the Specialty Engineer
7.3.11 The SE and the Industrial Engineer
7.3.12 The SE and Quality Assurance
CONTENTS

7.4 Building an Interdisciplinary Team

7.4.1 Team Fundamentals

7.4.2 Team Attitude

7.4.3 Team Selection

7.4.4 Team Life Cycle

7.5 Systems Engineering Responsibilities

7.5.1 Systems Engineering Management Plan (SEMP)

7.5.2 Technical Interface with Users and Consumers

7.5.3 System Requirements Analysis and Management

7.5.4 System Architecting

7.5.5 Interface Control Documents (ICDs)

7.5.6 Test and Evaluation Master Plan (TEMP)

7.5.7 Configuration Management (CM)

7.5.8 Specialty Engineering

7.5.9 Major Program Technical Reviews

7.5.10 System Integration and Test

7.6 Roles of the System Engineer

7.7 Characteristics of the Ideal Systems Engineer

7.8 Summary

7.9 Exercises

References

8 System Effectiveness

Edward Poht

8.1 Introduction to System Effectiveness

8.2 Reliability Modeling

8.3 Mathematical Models in Reliability

8.3.1 Common Continuous Reliability Distributions

8.3.2 Common Discrete Distributions

8.4 Basic System Models

8.4.1 Series System

8.4.2 Parallel System

8.4.3 JC-out-of-JV Systems

8.4.4 Complex Systems

8.5 Component Reliability Importance Measures

8.5.1 Importance Measure for Series System

8.5.2 Importance Measure for Parallel System

8.6 Reliability Allocation and Improvement

8.7 Markov Models of Repairable Systems

8.7.1 Kolmogorov Differential Equations

8.7.2 Transient Analysis

8.7.3 Steady State Analysis

PART III  SYSTEMS DECISION MAKING

9 Systems Decision Process Overview
Gregory 5. Pametl and Paul D. West

9.1 Introduction
9.2 Value-Focused Versus Alternative-Focused Thinking
9.3 Decision Quality
9.4 Systems Decision Process
9.5 Role of Stakeholders
9.6 Role of Decision Makers
9.7 Environment
9.8 Comparison with Other Processes
9.9 When to Use the Systems Decision Process
9.10 Tailoring the Systems Decision Process to the Systems Engineering Project
9.11 Example of Use of the Systems Decision Process
9.12 Illustrative Example: Systems Engineering Curriculum Management System (CMS)—Summary and Introduction
9.13 Exercises
References

10 Problem Definition
Timothy Trainor and Gregory S. Pametl

10.1 Introduction
10.1.1 Introduction to the Problem Definition Phase
10.1.2 Comparison with Other Systems Engineering Processes
10.1.3 Purpose of the Problem Definition Phase
10.1.4 Chapter Example
10.2 Stakeholder Analysis
10.2.1 Introduction
10.2.2 Techniques for Stakeholder Analysis
10.2.3 Stakeholder Analysis for the Rocket System Decision Problem
10.2.4 Conclusion
10.3 Functional Analysis

References
11.5 Summary
11.6 Illustrative Example: Systems Engineering Curriculum Management System (CMS)—Solution Design
11.7 Exercises
References

12 Decision Making
Michael J. Kwinn, Jr. and Gregory S. Parnell

12.1 Introduction
12.2 Preparing to Score Candidate Solutions
  12.2.1 Revised Problem Statement
  12.2.2 Value Models
  12.2.3 Candidate Solutions
  12.2.4 Modeling and Simulation Results
  12.2.5 Confirm Value Measure Ranges and Weights
12.3 Four Scoring Methods
  12.3.1 Operations
  12.3.2 Testing
  12.3.3 Modeling
  12.3.4 Simulation
  12.3.5 Expert Opinion
  12.3.6 Revisit Value Measures and Weights
12.4 Score Candidate Solutions or Candidate Components
  12.4.1 Software for Decision Analysis
  12.4.2 Candidate Solution Scoring and Value Calculation
  12.4.3 Candidate Components Scoring and System Optimization
12.5 Conduct Sensitivity Analysis
  12.5.1 Analyzing Sensitivity on Weights
  12.5.2 Sensitivity Analysis on Weights Using Excel
  12.5.3 Conduct Monte Carlo Simulation on Measure Scores
12.6 Use Value-Focused Thinking to Improve Solutions
12.7 Conduct Cost Analysis
12.8 Conduct Cost/Benefit Analysis
12.9 Prepare Recommendation Report and Presentation
  12.9.1 Develop Report
  12.9.2 Develop Presentation
12.10 Prepare for Solution Implementation
12.11 Illustrative Example: Systems Engineering Curriculum Management System (CMS)—Decision Making
12.12 Exercises
References
13 Solution Implementation  
Robert Powell  

13.1 Introduction  
13.2 The Solution Implementation Phase  
13.3 Planning for Action: The Work Breakdown Structure  
13.4 System Performance Measurement  
13.4.1 Monitoring  
13.4.2 Assessing  
13.4.3 Controlling  
13.5 Solution Implementation Strategy  
13.6 Implementation for the "Produce the System" Life Cycle Stage  
13.6.1 Planning for Action  
13.6.2 Developing the Organization  
13.6.3 Execution  
13.6.4 Assessment and Control  
13.7 Implementation for the "Deploy the System" Life Cycle Stage  
13.7.1 Planning for Action  
13.7.2 Execution  
13.7.3 Assessment and Control  
13.8 Implementation in the "Operate the System" Life Cycle Stage  
13.8.1 Planning for Action  
13.8.2 Execution  
13.8.3 Assessment and Control  
13.9 Summary  
13.10 Illustrative Example: Systems Engineering Curriculum Management System (CMS)—Implementation  
13.11 Exercises  
References  

14 Summary  
Gregory S. Parnell  

14.1 Systems Thinking is the Key to Systems Engineering and Systems Decision Making  
14.1.1 Systems Thinking Focuses on System Behavior in the Current and Future Operating Environment  
14.1.2 System Managers Must Consider the System Life Cycle  
14.1.3 Modeling and Simulation are Important Tools for Systems Engineers  
14.1.4 The System Life Cycle is a Key Risk Management Tool  
14.1.5 Life Cycle Costing is an Important Tool for Systems Engineering  
14.2 Systems Engineers Play a Critical Role in the System Life Cycle
14.2.1 Systems Engineers Lead Interdisciplinary Teams to Obtain System Solutions That Create Value for Decision Makers and Stakeholders 431
14.2.2 Systems Engineers Convert Stakeholder Needs to System Functions and Requirements 431
14.2.3 Systems Engineers Define Value and Manage System Effectiveness 432
14.2.4 Systems Engineers Have Key Roles Throughout the System Life Cycle 432

14.3 A Systems Decision Process is Required for Complex Systems Decisions 432
14.3.1 Problem Definition is the Key to Systems Decisions 433
14.3.2 If We Want Better Decisions, We Need Better System Solution Designs 433
14.3.3 We Need to Identify the Best Value for the Resources 433
14.3.4 Solution Implementation Requires Planning and Execution 433

14.4 Systems Engineering will Become More Challenging 434

Index 435
