Technology and Innovation Management on the move

From managing technology to managing innovation-driven enterprises
# Table of Contents

**PART I - TECHNOLOGICAL AWARENESS**

1 THE TECHNOLOGY AWARENESS GAP IN GENERAL MANAGEMENT

1.1 Technology - Omnipresent Reality of Achievements and Threats

1.2 The technology management paradox

1.3 Moreover: Europe's Performance Gap

1.4 Facing the Two Gaps: What is Next?

1.5 A Longterm Perspective: The Concept Enterprise Science

**PART II - THE DIFFICULTIES IN MANAGING DISCONTINUOUS TECHNOLOGY CHANGE**

2.1 Two Pattern of Technology Change

2.2 Discontinuous Technological Change: The Case of the Photography Industry

2.3 The Main Reasons for the Difficulties Managing Discontinuous Technological Change

2.3.1 Industry blindness

2.3.2 Managerial uncertainties

2.4 NextSteps

**PART II - THE CONCEPT OF THE INTEGRATED TECHNOLOGY AND INNOVATION MANAGEMENT**

3 THE CONCEPT OF INTEGRATED TECHNOLOGY AND INNOVATION MANAGEMENT
PART III - TASKS OF INTEGRATED TECHNOLOGY AND INNOVATION MANAGEMENT

4 TECHNOLOGY INTELLIGENCE - IMPROVING TECHNOLOGICAL DECISION-MAKING

4.1 Introduction

4.2 The Technology Intelligence Process
   4.2.1 Determination of information needs
   4.2.2 Information acquisition
   4.2.3 Information analysis
   4.2.4 Information communication

4.3 Organization of the Technology Intelligence Process
   4.3.1 Different technology intelligence structures
   4.3.2 Company examples of the organization of the technology intelligence process

4.4 Conclusion

5 TECHNOLOGY ROADMAPPING - A METHOD FOR TECHNOLOGY PLANNING

5.1 Introduction

5.2 Technology Roadmapping: A Beneficial Approach

5.3 An Integrated Approach to Technology Roadmapping

5.4 Implementation of Technology Roadmapping
   5.4.1 Best conditions for initiating the implementation
   5.4.2 Implementation team
   5.4.3 Implementation procedures

6 EVALUATING AND INTRODUCING DISRUPTIVE TECHNOLOGIES

6.1 Introduction

6.2 A Framework for Investigating the Evaluation and Introduction of Disruptive Technologies

6.3 The Practice of Evaluating and Introducing Nanotechnology in Switzerland
   6.3.1 Initiation of technology evaluation
   6.3.2 Technology scanning and monitoring
   6.3.3 Technology valuation
   6.3.4 Technology selection
   6.3.5 Technology implementation
6.4 Management Principles for Evaluating and Introducing Disruptive Technologies
   6.4.1 Technology scanning
   6.4.2 Environmental scanning
   6.4.3 Kickoff to technology evaluation
   6.4.4 Technology evaluation
   6.4.5 Technology selection
   6.4.6 Technology introduction

7 TECHNOLOGY TRANSFER - AN ACTION AND TECHNOLOGY PERSPECTIVE
   7.1 The Importance of Knowledge and Technology Transfer
   7.2 The Process of Transferring Knowledge
       7.2.1 Transferring data, information, and knowledge
       7.2.2 Constitutive elements of technology transfer
       7.2.3 Object of technology transfer: Knowledge
       7.2.4 Recipient of technological knowledge
       7.2.5 Drafting the technology transfer process
   7.3 Developing an Action-Oriented Model of a Technology Transfer Process
       7.3.1 Modeling
       7.3.2 Coaching
       7.3.3 Scaffolding and fading
       7.3.4 Reflection
       7.3.5 Exploration
   7.4 Conclusions

8 DEVELOPING TECHNOLOGICAL CORE COMPETENCIES - FRAMEWORK AND APPLICATION
   8.1 The Quest for Competitive Advantage: Insight from the Resource-Based View
   8.2 Developing a Framework for the Development of (Technological) Core Competences
       8.2.1 Development of cognitive advantage
       8.2.2 Transformation: From idea to competence
       8.2.3 Influencing market and competitor reaction
       8.2.4 Realization of core competence's value
   8.3 Case Study: New Technology-Based Firms (NTBF)
       8.3.1 Development of cognitive advantage
       8.3.2 Transformation from idea to competence
       8.3.3 Influencing market and competitor reaction
9 TECHNOLOGY SOURCING VIA ACQUISITIONS - AN INTEGRATED TECHNOLOGY DUE DILIGENCE-PROCESS

9.1 Introduction

9.2 Major Pitfalls in Technology-Intensive Acquisitions
   9.2.1 Lack of appropriate pre-conditions
   9.2.2 Inappropriate process design
   9.2.3 Inappropriate integration approach and management
   9.2.4 Lack of appropriate methodological competencies

9.3 Conceptual Framework: Outlook for an Integrated Technology Due Diligence

10 COMPETENCE MANAGEMENT WITH THE OPPORTUNITY LANDSCAPE

10.1 Introduction

10.2 Plan the Knowledge for Tomorrow - Today

10.3 The Opportunity Landscape
   10.3.1 Definition of relevant and potential knowledge domains
   10.3.2 Definition of the observation depth
   10.3.3 Visualization of the Opportunity Landscape
   10.3.4 Definition of the gatekeepers
   10.3.5 Gatekeeper tasks and communication
   10.3.6 Derivation of actions and updating
   10.3.7 Implementation of the Opportunity Landscape

10.4 Two Case Studies
   10.4.1 InstitutStraumannAG
   10.4.2 Roche Instrument Center

10.5 Conclusion

III3-EXPLOITATION & PROTECTION

11 EXTERNAL DEPLOYMENT OF TECHNOLOGIES

11.1 Introduction

11.2 Strategic Implications of External Technology Deployment
   11.2.1 Reference framework
   11.2.2 External technology deployment: opportunities and threats
   11.2.3 The implication of technology characteristics

11.3 Marketing Instruments in Technology Markets
   11.3.1 Objects of transfer
   11.3.2 Communication channels
14.2.3 Technology beliefs and boundary systems ........................................ 246
14.2.4 A system for controlling technology strategy and performance ........ 247

14.3 Practical Solutions Based on a Technology Management Control System ...... 247
14.3.1 Infineon Technologies ......................................................................... 247
14.3.2 Action research at Infineon: Technology performance measurement ....... 249

14.4 Verifying the TMCS on the Basis of the Solution ..................................... 256
14.4.1 Diagnostic technology control system .................................................. 256
14.4.2 Interactive technology control system ................................................... 257
14.4.3 Technology beliefs and boundary systems ............................................. 258

14.5 Conclusion .................................................................................................. 258

III 5- TECHNOLOGY INNOVATION ................................................................. 261

15 MANAGING THE EARLY PHASES OF THE RADICAL INNOVATION PROCESS 263
15.1 Introduction .............................................................................................. 263
15.2 Changing Attitudes Towards the Importance of Radical Innovations ............. 263
15.3 Different Approaches to Managing the Early Phases of Radical Innovations ... 264
15.4 A Process View of the Early Phases of Radical Innovations ....................... 266
15.5 Managerial Implications .......................................................................... 270
15.6 Conclusion ............................................................................................... 272

16 THE INNOVATIONS STRATEGY DEVELOPMENT PROCESS BASED ON INNOVATION ARCHITECTURE ................................................................. 273
16.1 Introduction .............................................................................................. 273
16.2 The Importance of an Innovation Strategy ................................................ 273
16.3 Developing an Innovation Strategy ........................................................... 274
   16.3.1 Phase I: Identification ........................................................................ 275
   16.3.2 Phase II: Evaluation of innovation opportunities .................................. 280
   16.3.3 Phase III: Formulating the innovation strategy .................................... 283
16.4 Summary and Outlook ............................................................................. 283
17  TECHNOLOGY MANAGEMENT FOR START-UPS: POCKET-TM. 287

17.1 Introduction .......................................................................................................................... 287
17.2 Definition of the NTBF ........................................................................................................ 287
17.3 Does an NTBF need Technology Management - a PockeTM? ........................................ 288
17.4 Five Key Elements of PockeTM ....................................................................................... 289
   17.4.1 Doing technology intelligence ..................................................................................... 289
   17.4.2 Development of technology strategy ........................................................................... 290
   17.4.3 Controlling technology management ........................................................................... 292
   17.4.4 Knowledge management ............................................................................................. 293
   17.4.5 Network management ................................................................................................. 294
17.5 Integration of PockeTM in the Firm Context .................................................................... 295

REFERENCES ............................................................................................................................. 297
