Classical Genetic Research and its Legacy
The mapping cultures of twentieth-century genetics

Edited by
Hans-Jorg Rheinberger and Jean-Paul Gaudilliere
Contents

List of figures xiii
Notes on contributors xvii

Introduction
HANS-JORG RHEINBERGER AND JEAN-PAUL GAUDILLIERE

PARTI
Mendelian genetics and linkage mapping 7

1 Linkage before Mendelism? Plant-breeding research in Central Europe, c. 1880-1910 9
JONATHAN HARWOOD

Nineteenth-century breeders’ work on correlation 9
Early Mendelian views of correlation 13
Conclusion 15

2 Carl Correns and the early history of genetic linkage 21
HANS-JORG RHEINBERGER

Introduction 21
Experiments with Matthiola 22
Correns’ chromosome theory 25
Concluding epistemological considerations 29
x Contents

3 Applying and extending the notion of genetic linkage: the first fifty years

RAPHAEL FALK

Compound unit-characters 35
Chromosomes constrain independent segregation 36
Linkage as an analytic tool 38
Recombination mechanics: chiasmatype or else? 41
Linkage maps 45
The cytological link 49
Conclusions: the impact of the linkage concept on genetic analysis 52

4 Classical genetics and the geography of genes

LISA GANNETT AND JAMES R. GRIESEMER

Introduction 57
Historiography of genetic mapping 58
Hybrids all the way down (and up): problems, protocols, and maps 60
Pragmatic aspects of geographical maps 73
Conclusion 84

PART II
Mapping work, mapping collectives, mapping cultures 89

5 Mapping and seeing: Barbara McClintock and the linking of genetics and cytology in maize genetics, 1928-35

LEE B. KASS AND CHRISTOPHE BONNEUIL

Emerson, maize, and genetics 92
Cytology meets corn genetics 101
Conclusion: seeing and mapping 109

6 The ABO blood groups: mapping the history and geography of genes in Homo sapiens

LISA GANNETT AND JAMES R. GRIESEMER

Introduction 119
The human genome diversity project: contesting disciplinary boundaries and the historical legacy of ABO blood group research 121
Mapping the history and geography of genes in Homo sapiens 124
Conclusion: mapping people, mapping flies 165
## Contents

### 7 Mapping as technology: genes, mutant mice, and biomedical research (1910-65) 173
JEAN-PAUL GAUDILLIERE

**Introduction** 173  
Inbreeding, and physiological studies within the Bussey school 174  
Mouse genetics as tool: the Jackson Biomedical Culture 185  
Scaling-up: mapping in the era of big biomedicine 193  
Conclusion 200

### Commentaries 205

**Genetic mapping: approaches to the spatial topography of genetics** 207
DAVID TURNBULL

- Maps as representations 208  
- Maps as discursive devices for making connections and assemblages 209  
- Maps as devices to materialize questions 210  
- Maps as tools for control, appropriation, and ideological expression 210  
- Mapping as a fundamental cognitive process 211  
- Mapping and knowledge spaces 212  
- Mapping as boundary objects—devices for handling multiplicity, heterogeneity, and messiness 212  
- Maps as spatial and temporal narratives 213  
- Unmapping and remapping 214  
- Evolution, mapping, narrativity, and reflexive difficulties 215

**Mapping as a cultural practice** 220
JENS LACHMUND

- The diversity of maps 221  
- Mapping as a cultural category 222  
- The stabilization of cartographic knowledge 223  
- Concluding remarks 225
