Preface and walk-through tour xxi

PART 1 Introduction to Management and Cost Accounting 3

1	Introduction to management accounting	5
	The users of accounting information	6
	Differences between management accounting and financial accounting	7
	The decision-making process	8
	Changing competitive environment	12
	Changing product life cycles	13
	Focus on customer satisfaction and new management approaches	13
	The impact of information technology	16
	international convergence of management accounting practices	18
	Functions of management accounting	18
	A brief historical review of management accounting	20
	Summary of the contents of this book	21
	Guidelines for using this book	22
	Summary	22
	Note	24
	Key terms and concepts	24
	Key examination points	25
	Assessment material	27
2	An introduction to cost terms and concepts	29
	Cost objects	30
	Direct and indirect costs	30
	Period and product costs	32
	Cost behaviour	32
	Relevant and irrelevant costs and revenues	37
	Avoidable and unavoidable costs	38
	Sunk costs	38
	Opportunity costs	39
	Incremental and marginal costs	39
	Job costing and process costing systems	40
	Maintaining a cost database	40

133 A

Summary	42
Key terms and concepts	43
Recommended reading	43
Key examination points	43
Assessment material	45

PART 2

Cost Accumulation for Inventory Valuation and Profit Measurement 55

3	Cost assignment	57
	Assignment of direct and indirect costs	58
	Different costs for different purposes	58
	Cost-benefit issues and cost systems design	60
	Assigning direct costs to cost objects	61
	Plant-wide (blanket) overhead rates	61
	Cost centre overhead rates	63
	The two-stage allocation process	64
	An illustration of the two-stage process for a traditional costing system	64
	An illustration of the two-stage process for an ABC system	72
	Extracting relevant costs for decision-making	75
	Budgeted overhead rates	77
	Under- and over-recovery of overheads	77
	Maintaining the database at standard costs	78
	Non-manufacturing overheads	79
	Summary	80
	Appendix 3.1: Inter-service department reallocations	82
	Appendix 3.2: Other allocation bases used by traditional systems	87
	Key terms and concepts	89
	Recommended reading	90
	Key examination points	90
	Assessment material	91
4	Accounting entries for a job costing system	m
	Materials recording procedure	112
	Pricing the issues of materials	112
	Control accounts	114
	Recording the purchase of raw materials	115
	Recording the issue of materials	118
	Accounting procedure for labour costs	119
	Accounting procedure for manufacturing overheads	120
	Non-manufacturing overheads	121
	Accounting procedures for jobs completed and products sold	122
	Costing profit and loss account	123
	Interlocking accounting	123
	Accounting entries for a JIT manufacturing system	124
	Contract costing	126

Work in progress valuation and amounts recoverable on contracts	131
Summary	132
Key terms and concepts	134
Recommended reading	134
Key examination points	134
Assessment material	135

5 Process costing 153

How of production and costs in a process costing system	154
Process costing when all output is fully complete	154
Process costing with ending work in progress partially complete	162
Beginning and ending work in progress of uncompleted units	165
Partially completed output and losses in process	169
Process costing for decision-making and control	170
Batch/operating costing	171
Surveys of practice	172
Summary	172
Appendix 5.1: Losses in process and partially completed units	174
Key terms and concepts	179
Key examination points	180
Assessment material	181

6 Joint and by-product costing 197

Distinguishing between joint products and by-products	198
Methods of allocating joint costs	198
Irrelevance of joint cost allocations for decision-making	206
Accounting for by-products	208
By-products, scrap and waste	210
Summary	210
Key terms and concepts	211
Recommended reading	211
Key examination points	212
Assessment material	213

Income effects of alternative cost accumulation systems 229

External and internal reporting	230
Variable costing	231
Absorption costing	233
Variable costing and absorption costing: a comparison of their impact on profit	234
A mathematical model of the profit functions	236
Some arguments in support of variable costing	237
Some arguments in support of absorption costing	238
Alternative denominator level measures	239
Summary	242
Appendix 7.1: Derivation of the profit function for an absorption costing system	244
Key terms and concepts	245
Key examination points	245
Assessment material	247

PART 3

Information for Decision-making 261

8	Cost-volume-profit analysis 263	<ul style="list-style-type: none"> The economist's model 264 The accountant's cost-volume-profit model 267 Application to longer-term time horizons 269 A mathematical approach to cost-volume-profit analysis 269 Margin of safety 274 Constructing the break-even chart 274 Alternative presentation of cost-volume-profit analysis 276 Multi-product cost-volume-profit analysis 278 Cost-volume-profit analysis assumptions 281 Cost-volume-profit analysis and computer applications 284 Separation of semi-variable costs 284 Summary 285 Appendix 8.1: CVP analysis applied to absorption costing 286 Key terms and concepts 289 Key examination points 289 Assessment material 291
9	Measuring relevant costs and revenues for decision-making 313	<ul style="list-style-type: none"> The meaning of relevance 314 Importance of qualitative factors 315 Special pricing decisions 315 Product-mix decisions when capacity constraints exist 320 Replacement of equipment - the irrelevance of past costs 322 Outsourcing and make or buy decisions 324 Discontinuation decisions 328 Determining the relevant costs of direct materials 330 Determining the relevant costs of direct labour 331 Misconceptions about relevant costs 333 Summary 334 Appendix 9.1: The theory of constraints and throughput accounting 335 Key terms and concepts 340 Recommended reading 340 Key examination points 340 Assessment material 343
10	Activity-based costing 369	<ul style="list-style-type: none"> The need for a cost accumulation system in generating relevant cost information for decision-making 370 Types of cost system 371 A comparison of traditional and ABC systems 372 The emergence of ABC systems 374 Volume-based and non-volume-based cost drivers 374 Designing ABC systems 377

Activity hierarchies	381	
Activity-based costing profitability analysis	383	
Resource consumption models	384	
Selecting the cost driver denominator level	387	
Cost versus benefits considerations	389	
Periodic review of an ABC data base	389	
ABC in service organizations	390	EJ
ABC cost management applications	391	
Pitfalls in using ABC information	392	
Summary	393	MIT
Key terms and concepts	396	
Recommended reading	396	
Key examination points	396	
Assessment material	397	

11 Pricing decisions and profitability analysis 411

Economic theory	412	
Calculating optimum selling prices using differential calculus	416	
Difficulties with applying economic theory	417	
The role of cost information in pricing decisions	418	
A price setting firm facing short-run pricing decisions	418	
A price setting firm facing long-run pricing decisions	419	
A price taker firm facing short-run product-mix decisions	425	
A price taker firm facing long-run product-mix decisions	425	
Cost-plus pricing	427	
Pricing policies	432	
Customer profitability analysis	433	
Summary	435	
Note	438	
Key terms and concepts	438	
Recommended reading	438	
Key examination points	438	
Assessment material	439	3ifT

12 Decision-making under conditions of risk and uncertainty 451

A decision-making model	452	
Risk and uncertainty	453	
Probabilities	454	
Probability distributions and expected value	455	
Measuring the amount of uncertainty	456	
Attitudes to risk by individuals	459	
Decision-tree analysis	460	
Cost-volume-profit analysis under conditions of uncertainty	462	
Buying perfect and imperfect information	463	
Maximin, maximax and regret criteria	463	
Portfolio analysis	465	
A more complex illustration	466	
Summary	469	
Appendix 12.1: Cost-volume-profit analysis under conditions of uncertainty	470	

PART 4 Information for Planning, Control and Performance Measurement 587

15 The budgeting process 589

- Stages in the planning process 590
- The multiple functions of budgets 593
- Conflicting roles of budgets 595
- The budget period 595
- Administration of the budgeting process 596
- Stages in the budgeting process 597
- A detailed illustration 600
- Sales budget 603
- Production budget and budgeted stock levels 604
- Direct materials usage budget 605
- Direct materials purchase budget 605
- Direct labour budget 606
- Factory overhead budget 606
- Selling and administration budget 607
- Departmental budgets 607
- Master budget 608
- Cash budgets 609
- Final review 610
- Computerized budgeting 610
- Activity-based budgeting 611
- The budgeting process in non-profit-making organizations 615
- Zero-based budgeting 618
- Summary 621
- Note 623
- Key terms and concepts 623
- Recommended reading 623
- Key examination points 623
- Assessment material 625

16 Management control systems 643

- Control at different organizational levels 644
- Different types of controls 644
- Cybernetic control systems 648
- Feedback and feed-forward controls 649
- Harmful side-effects of control 650
- Advantages and disadvantages of different types of controls 652
- Management accounting control systems 652
- Responsibility centres 653
- The nature of management accounting control systems 655
- The controllability principle 656
- Setting financial performance targets 661
- Participation in the budgeting and target setting process 665
- Side-effects arising from using accounting information for performance evaluation 668

Summary 670 J* TflA^dJ

17 Contingency theory and organizational and social aspects of management accounting 695

An overview of contingency theory 696 •'rfI
 The impact of contingent factors on management accounting information systems 698 LA ml?
 Types of controls in relation to the transformation process and output measurement 705
 Scorekeeping and uncertainty 706 ,- <sfI
 Programmed and non-programmed decisions 708
 Accounting information, decision-making and uncertainty 709
 Purposes of management accounting 711 ibu
 Summary 716 >^"<
 Key terms and concepts 718 VOd ft^bud

18 Standard costing and variance analysis 1 725

Operation of a standard costing system 726
 Establishing cost standards 729
 Types of cost standards 732 i _.
 Variance analysis 735 • . . . •• i
 Material variances 735 t5- 2 ^41
 Material price variances 737
 Material usage variance 739 - ui^srniir¹ ya5(
 Joint price usage variance 740 Z£\$ iii^.^u^
 Total material variance 740 '*
 Labour variances 741 _ *n^N; At
 Wage rate variance 741
 Labour efficiency variance 742 ^ Umno'3
 Total labour variance 742 ' akuuiioj lo
 Variable overhead variances 743
 Variable overhead expenditure variance 743
 Variable overhead efficiency variance 744 i •. ^ ^ .-ibi
 Similarities between materials, labour and overhead variances 744
 Fixed overhead expenditure or spending variance 745
 Sales variances 746 ££d ?:
 Total sales margin variance 746
 Sales margin price variance 747
 Sales margin volume variance 747 kligi&i -XHUIKTV;
 Difficulties in interpreting sales margin variances 748
 Reconciling budgeted profit and actual profit 748
 Standard absorption costing 748

Volume variance 750

Volume efficiency variance 751

Volume capacity variance 752

Summary of fixed overhead variances 753

Reconciliation of budgeted and actual profit for a standard absorption costing system 754

Performance reports 754

Summary 757

Key terms and concepts 758

Key examination points 760

Assessment material 761

19 Standard costing and variance analysis 2: further aspects 777

Direct materials mix and yield variances 778

Sales mix and sales quantity variances 782

Recording standard costs in the accounts 786

Accounting disposition of variances 793

Ex post variance analysis 795

Variance analysis and the opportunity cost of scarce resources 798

The investigation of variances 801

Types of variances 802

Simple rule of thumb cost investigation models 803

Statistical models not incorporating costs and benefits of investigation 804

Decision models with costs and benefits of investigation 806

Quantity variances 808

Criticisms of standard costing 809

The future role of standard costing 812

Summary 815

Notes 817

Key terms and concepts 818

Recommended reading 818

Key examination points 818

Assessment material 819

20 Divisional financial performance measures 837

Functional and divisionalized organizational structures 838

Profit centres and investment centres 840

Advantage of divisionalization 840

Disadvantages of divisionalization 841

Pre-requisites for successful divisionalization 841

Distinguishing between the managerial and economic performance of the division 842

Alternative divisional profit measures 842

Return on investment 845

Residual income 846

Economic value added (EVA™) 848

Determining which assets should be included in the investment base 850

The impact of inflation 851

The impact of depreciation 851

The effects of performance measurement on capital investment decisions 853

Determining the divisional cost of capital charge 855
 Addressing the dysfunctional consequences of short-term financial performance measures 856
 Summary 858
 Appendix 20.1: Reconciling short- and long-term residual income/EVA™ measures 860
 Notes 865
 Key terms and concepts 865
 Recommended reading 866
 Key examination points 866
 Assessment material 867

21 Transfer pricing in divisionalized companies 883

Purposes of transfer pricing 884
 Alternative transfer pricing methods 885
 Market-based transfer prices 886
 Marginal cost transfer prices 890
 Full cost transfer prices 891
 Cost-plus a mark-up transfer prices 892
 Negotiated transfer prices 893
 Marginal cost plus opportunity cost 894
 An illustration of transfer pricing 895
 Proposals for resolving transfer pricing conflicts 898
 Domestic transfer pricing recommendations 904
 International transfer pricing 904
 Economic theory of transfer pricing 907
 Summary 913
 Appendix 21.1: Economic analysis of transfer pricing 915
 Notes 920
 Key terms and concepts 920
 Recommended reading 920
 Key examination points 921

PART 5

Cost Management and Strategic Management Accounting 941

22 Cost management 943

Life-cycle costing 944
 Target costing 945
 Kaizen costing 950
 Activity-based management 951
 Business process re-engineering 956
 Cost of quality 957
 Cost management and the value chain 961
 Benchmarking 965

Environmental cost management 965
 Just-in-time systems 967
 Summary 971
 Key terms and concepts 973
 Recommended reading 973
 Key examination points 974
 Assessment material 975

23 Strategic management accounting 991

What is strategic management accounting? 992
 Surveys of strategic management accounting practices 997
 The balanced scorecard 999
 The balanced scorecard as a strategic management system 1003
 Benefits and limitation of the balanced scorecard approach 1003
 Establishing objectives and performance measures 1004
 The financial perspective 1004
 The customer perspective 1006
 The internal business perspective 1009
 The learning and growth perspective 1013
 Performance measurement in service organizations 1014
 Summary 1017
 Note 1019
 Key terms and concepts 1019
 Recommended reading 1019
 Key examination points 1019
 Assessment material 1021

PART 6

The Application of Quantitative Methods to Management Accounting 1033

24 Cost estimation and cost behaviour 1035

General principles applying to estimating cost functions 1036
 Cost estimation methods 1038
 Multiple regression analysis 1045
 Factors to be considered when using past data to estimate cost functions 1047
 Relevant range and non-linear cost functions 1048
 A summary of the steps involved in estimating cost functions 1049
 Cost estimation when the learning effect is present 1051
 Estimating incremented hours and incremental cost 1053
 Learning curve applications 1054
 Cost estimation techniques used in practice 1055
 Summary 1056
 Appendix 24.1: Tests of reliability 1057
 Key terms and concepts 1064
 Recommended reading 1064

Key examination points 1064
Assessment material 1065

25 Quantitative models for the planning and control of stocks 1075

Why do firms hold stocks? 1076
Relevant costs for quantitative models under conditions of certainty 1076
Determining the economic order quantity 1077
Assumptions of the EOQ formula 1080
Application of the EOQ model in determining the optimum size for a production run 1081
Quantity discounts 1082
Determining when to place the order 1083
Uncertainty and safety stocks 1084
The use of probability theory for determining safety stocks 1085
Control of stocks through classification 1087
Other factors influencing the choice of order quantity 1088
Materials requirement planning 1089
Just-in-time purchasing arrangements 1091
Summary 1091
Note 1093
Key terms and concepts 1093
Recommended reading 1093
Key examination points 1093
Assessment material 1095

26 The application of linear programming to management accounting 1107

Single-resource constraints 1108
Two-resource constraints 1108
Linear programming 1109
Graphical method 1111
Simplex method 1116
Interpreting the final matrix 1120
Opportunity cost 1120
Substitution process when additional resources are obtained 1121
Uses of linear programming 1122
Summary 1125
Appendix 26.1: The application of linear programming to capital budgeting 1126
Notes 1128
Key terms and concepts 1128
Key examination points 1128
Assessment material 1131
