Contents

Preface
List of Contributors

1. Introduction to Experimental Economics
   Alvin E. Roth

I. A Brief History of Experimental Economics
   A. Early Experiments: 1930-1960
      1. Individual Choice and the Wallis-Friedman Critique
      2. Game-Theoretic Hypotheses
      3. Industrial Organization
   B. The 1960s to the Present

II. The Uses of Experimentation

III. Some Series of Experiments
   A. Prisoners' Dilemmas and Public Goods
      1. The Prisoner's Dilemma
         a. Experiments versus Simulations: A Methodological Digression
      2. The Free-Rider Problem in Public Goods Provision
   B. Coordination
      Organization of topics:
      1. Coordination and coordination failure
      2. Learning and adaptation
   C. Bargaining Behavior
      Organization of topics:
      1. Nash's model of bargaining
      2. Controlling for unobserved risk posture: binary lottery payoffs
      3. Information in bargaining
      4. Risk aversion in bargaining
   D. Market Organization and Competitive Equilibrium
      1. Repeated Double Auctions with Stationary Parameters
      2. Some Policy-Oriented Comparisons of Market Rules
      3. Information Aggregation: Markets as Forecasters
   E. Auction Markets and Disequilibrium Behavior
      1. The Winner's Curse
      2. Some Other Auction Results
         a. Controlling Incentives: A Methodological Digression
F. Individual Choice Behavior
   1. Preference Reversals
      a. Alternative Theoretical Directions
      b. Market Behavior
   2. Other Choice Phenomena
   3. Why Haven't These Demonstrated Anomalies Swept Away Utility Theory?
   4. Experimental Control of Individual Preferences
      a. The BDM Procedure for Measuring Reservation Prices
      b. Controlling Preferences with Monetary Payoffs
      c. Controlling for Unobserved Risk Preferences with Binary Lottery Payoffs
      (1) Preferences and Probabilities: A Historical Digression on Binary Lotteries and Related Experimental Designs
      d. To Control or Not to Control? Costs and Benefits

Notes  86
Bibliography  98

   John O. Ledyard  111
   I. Introduction  111
      A. A Simple Public Goods Experiment  112
      B. The Art of Experiment: Sensitivity and Control  113
      C. The Language of Experiment: Mechanisms and Environments  115
      D. The Range of Public Goods Environments  118
      E. What Is and Is Not to Be Surveyed  119
   II. Are People Selfish or Cooperative?  121
      A. Bohm: Estimating Demand  122
      B. Dawes et al: Social Dilemmas  126
      C. Marwell et al.: The Free-Rider Problem  130
      D. Economists Begin to React  134
      E. Isaac et al.: Systematic Study by Economists  137
   III. What Improves Cooperation?  141
      A. Thresholds and Provision Points  144
      B. Experience, Repetition, and Learning  146
      C. Strong Effects  149
         1. Marginal Payoffs and Rebates
         2. Numbers
         3. Communication
      D. Weak Effects  158
         1. Environment
         2. Systemic
         3. Institutional
      E. Unknown Effects  167

#### 3. Coordination Problems

*Jack Ochs*

<table>
<thead>
<tr>
<th>Introduction</th>
<th>195</th>
</tr>
</thead>
</table>

#### I. Experiments Using Overlapping Generations Environments

| A. Adaptive Learning Processes and Rational Expectations Equilibria | 197 |
| B. The Path of Prices When the Rate of Growth of the Money Stock Is Zero | 199 |
| C. Price Inflation with a Growing Money Stock | 201 |
| D. Sunspots | 205 |

#### II. Coordination Games with Pareto Ranked Equilibria

| A. Payoff Dominance, Security and Historical Precedent | 209 |
| B. The Relevance of Dominated Strategies | 218 |
| C. Influencing Equilibrium Selection | 222 |

#### III. Experiments in Decentralized Matching Environments: Games with Multiple Optimal Equilibria

| 233 |

#### IV. Concluding Remarks

| 244 |

| Notes | 246 |
| Bibliography | 249 |

#### 4. Bargaining Experiments

*Alvin E. Roth*

<table>
<thead>
<tr>
<th>I. Agreements</th>

</tr>
</thead>
<tbody>
<tr>
<td>A. Unstructured Bargaining Experiments</td>
<td>255</td>
</tr>
<tr>
<td>B. Sequential Bargaining Experiments</td>
<td>256</td>
</tr>
</tbody>
</table>

1. *An Initial Exchange of Views*
2. *A Larger Experimental Design*
3. *Investigating Observed Regularities*
   a. Are Players "Trying to Be Fair"?
4. *Pursuing Anomalies*
   a. Distinguishing between Alternative Hypotheses
   b. A Cross-Cultural Experiment
5. *Learning and the Role of Experience*

<table>
<thead>
<tr>
<th>II. Disagreements and Delays</th>
<th>292</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. The Frequency of Disagreements and Delays</td>
<td>292</td>
</tr>
<tr>
<td>B. Anonymous versus Face-to-Face Bargaining</td>
<td>294</td>
</tr>
</tbody>
</table>

1. Two Hypotheses
a. The Uncontrolled Social Utility Hypothesis
b. The Communication Hypothesis

2. A New Experiment
3. Some Further Experiments
4. Recapitulation of the Methodological Issues

C. Tests of Hypotheses about the Causes of Disagreements and Costly Delays
1. Nonstrategic Models
2. Strategic Models
   a. Complete Information Models
   b. Incomplete Information Models
   c. A Digression on the Strategy Method

D. Deadlines

III. Concluding Remarks

Notes
Bibliography

5. Industrial Organization: A Survey of Laboratory Research

Charles A. Holt

I. Overview

II. Beginnings

III. The Relevance of Experiments to the Study of IO
   A. Experiments That Evaluate Behavioral Assumptions
   B. Tests for Sensitivity to Violations of Structural Assumptions
   C. Searching for Empirical Regularities

IV. Design and Procedural Issues
   A. Instructions
   B. Design Considerations

V. Trading Institutions
   A. Posted Prices
   B. Uniform Prices
   C. One-Sided Sequential Auctions
   D. Double Auctions
   E. Decentralized Negotiations
   F. Discounting
   G. Other Institutions
   H. Disadvantages of the Cournot Quantity-Choice Institution

VI. Monopoly Regulation and Potential Entry
   A. Monopoly
   B. Decentralized Regulatory Proposals
   C. Potential Competition as a Regulator: Market Contestability
   D. Predatory Pricing and Antitrust Remedies
Auctions: A Survey of Experimental Research

John H. Kagel

Introduction

I. The Symmetric Independent Private-Values Model

A. Experimental Procedures

B. Tests of the Revenue-Equivalence Theorem
   1. Tests of the Strategic Equivalence of First-Price and Dutch Auctions
   2. Tests of the Strategic Equivalence of Second-Price and English Auctions

C. Effects of Varying and Uncertain Numbers of Bidders
   1. Effects of Changing Numbers of Bidders
   2. Uncertainty Regarding the Number of Bidders

D. Auctions with Affiliated Private Values

E. Effects of Price Information in Private Value Auctions

F. Learning, Adjustment Processes, and Cash Balance Effects in First-Price Private Value Auctions

G. Risk Aversion, CRRA, the Flat Maximum Critique, and the Binary Lottery Procedure for Controlling Risk Preferences
   1. Risk Aversion and CRRA As Applied to Single Unit First-Price Auctions
   2. The Flat Maximum Critique
   3. Risk Aversion and Overbidding in Related Environments
   4. Using the Binary Lottery Procedure to Control for Risk Aversion

II. Common Value Auctions

A. The Winner's Curse in Sealed Bid Common Value Auctions
   1. First-Price Sealed Bid Auctions
   2. Limited Liability and "Safe Havens"
   3. Second-Price Sealed Bid Auctions

B. More Winner's Curse: English Auctions and First-Price Auctions with Asymmetric Information

VII. Laboratory Modeling of Asset Markets

VIII. Concluding Remarks

Notes

Bibliography
C. The Winner's Curse in Other Market Settings 550
   1. The Winner's Curse in Bilateral Bargaining Games with Asymmetric Information
   2. The Winner's Curse in "Blind Bid" Auctions
   3. Lemons and Ripoffs: The Winner's Curse in Markets with Quality Endogenously Determined
D. Learning and Adjustment Processes in Markets with a Winner's Curse 557

III. Additional Topics 560
A. Collusion 560
B. Comparing Results from Field Studies with Experiments 564
   1. Direct Comparisons between Laboratory and Field Data
   2. Differences in Structure between Laboratory and Field Auctions
C. Two-Sided Auctions 569
D. Other Auction Studies 572

IV. Conclusions 572
Notes 573
Bibliography 580

8. Individual Decision Making
Colin Camerer 587
I. Introduction 587
   A. Limited Rationality and Decision Research 588
      1. Why Study Errors in Decision Making?
   B. Two Controversies: Methods and Implications 588
   C. A Map and Guidebook 589

II. Judgment 590
   A. Calibration 590
      1. Scoring Rules
      2. Confidence Intervals
   B. Perception and Memory Biases 595
   C. Bayesian Updating and Representativeness 596
      1. Underweighting of Base Rates
      2. Underweighting of Likelihood Information (Conservatism)
      3. The Law of Small Numbers and Misperceptions of Randomness
      4. Market Level Tests of Representativeness
   D. Confirmation Bias and Obstacles to Learning 608
   E. Expectations Formation 609
   F. Iterated Expectations and the Curse of Knowledge 612
      1. False Consensus and Hindsight Bias
      2. Market Level Tests of Curse of Knowledge
G. The Illusion of Control
H. Judgment: Summary and New Directions

III. Choice under Risk and Uncertainty

A. Expected Utility
   1. Notation and a Diagram
   2. The Axioms

B. Some History and Early Evidence
   1. Three Controversies
   2. Initial Tests

C. Mounting Evidence of EU Violation (1965-1986)
   1. The Allais Paradoxes
   2. Process Violations
   3. Prospect Theory
   4. Elicitation Biases

D. Generalizations of Expected Utility and Recent Tests
   1. Predictions of Generalized EU Theories
   2. Empirical Studies Using Pairwise Choices
   3. Empirical Studies Measuring Indifference Curves
   4. Empirical Studies Fitting Functions to Individuals
   5. Cross-Species Robustness: Experiments with Animals
   6. Some Conclusions from Recent Studies
   7. Investments in Risky Assets

E. Subjective Expected Utility
   1. The Ellsberg Paradox
   2. Conceptions of Ambiguity
   3. Empirical Tests
   4. Formal Models
   5. Applications to Economics

F. Choice over Time

G. Process Theories and Tests

H. Description Invariance
   1. Framing Effects
   2. Lottery Correlation, Regret, and Display Effects
   3. Compound Lottery Reduction

I. Procedure Invariance
   1. New Evidence of Preference Reversal
   2. Arbitrage and Incentives
   3. Reversals and Markets
   4. Social Comparison and Reversals
   5. Some Conclusions about Preference Reversals

J. Endowment Effects and Buying-Selling Price Gaps
   1. Market Experiments
   2. Explanations Based on Experimental Artifacts
   3. Endowment Effects: Some Psychology and Implications
K. Search 670
  1. Search for Wages and Prices
  2. Search for Information
L. Choice: Summary and New Directions 673

IV. Conclusions and Research Directions 674
